SEP 17 1997

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

In the Matter of )

Implementation of the Pay Telephone )  
Reclassification and Compensation Provisions )  
of the Telecommunications Act of 1996 )

CC Docket No. 96-128

PACIFIC BELL AND NEVADA BELL )

Comparably Efficient Interconnection )  
Plan for the Provision of Payphone Service )

DOCKET FILE COPY ORIGINAL

**MINOR AMENDMENT TO CEI PLAN**

Pacific Bell and Nevada Bell submit this amendment to their approved Comparably Efficient Interconnection ("CEI") Plan for the Provision of Basic Payphone Service.<sup>1</sup> This amendment merely adds to the Plan an underlying basic service, Off Premise Service, which Pacific Bell has offered for years via California State tariffs to all customers.<sup>2</sup> The same tariffed service, at the same tariffed rates, terms, and conditions, is available to all other PSPs as to Pacific Bell's deregulated payphone

---

<sup>1</sup> Pacific Bell's and Nevada Bell's CEI Plan was approved in Pacific Bell and Nevada Bell Comparably Efficient Interconnection Plan for the Provision of Basic Telephone Service, Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996, CC Docket No. 96-128, Order, Released April 15, 1997 ("Pacific Bell Payphone CEI Plan Order").

<sup>2</sup> Pacific Bell's State tariffs for Off Premise Service are attached hereto as Exhibit A.

No. of Copies rec'd  
List ALCODE

043

service operation. Accordingly, this is a "minor" amendment which should become effective in 14 days.<sup>3</sup>

The Pacific Bell payphone service operation's use of Off Premise Service is for interconnection of certain unregulated payphone equipment (*i.e.*, Inmate Call Control Units) that is collocated in various Pacific Bell central offices. This application is consistent with Pacific Bell's and Nevada Bell's CEI Plan, which states:

"All the unregulated call control equipment that our payphone operation uses is located on the customers' premises, except Pacific Bell's Inmate Call Control Units ("ICCU") which we have in central offices because LEC payphones traditionally were part of network service. All our call control equipment, regardless of location, will interconnect to the network using the same tariffed service (*i.e.*, COPT Service, including 1PF) at the same price as is available to independent PSPs for use with their call control equipment on customers' premises."

This amendment adds Off Premise Service as a tariffed service for interconnection of ICCUs in those cases where Pacific Bell chooses to use a collocated ICCU to serve more than one customer's premises (*i.e.*, more than one inmate facility). This addition provides Pacific Bell's payphone service operation with the same option that is available to independent PSPs who may choose to use call control equipment on one customer's premise to serve not only that customer but also one or more other customers.

---

<sup>3</sup> See Bell Operating Companies' Joint Petition for Waiver of Computer II Rules, DA 95-36, Memorandum Opinion And Order, 10 FCC Rcd 1724, para. 30(a) and n. 71 (1995) ("BOC Waiver Order"). See also, *e.g.*, Bell Atlantic's amendment to add an underlying basic service to its Plans, which was deemed approved without a comment cycle or an Order. The Bell Atlantic Telephone Companies Offer of Comparably Efficient Interconnection To Providers of Voice Messaging Services. Offer of Comparably Efficient Interconnection to Providers of Gateway Services, Minor Amendment to Bell Atlantic's CEI Plans, July 31, 1995.

Independent PSPs may use Off Premise Service for that purpose at the same tariffed prices, terms, and conditions as are available to Pacific Bell's payphone service operation.

Pacific Bell's use of Off Premise Service with unregulated payphone equipment meets all the Commission's CEI requirements:<sup>4</sup>

- The technical characteristics of Off Premise Service are identical for use by both Pacific Bell's payphone operations and by other PSPs, and Pacific Bell's tariffs reference technical standards.<sup>5</sup>
- Off Premise Service has standardized technical interconnections that are available to all other PSPs.<sup>6</sup>
- Pacific Bell's effective State tariffs for Off Premise Service are attached hereto as Exhibit A.<sup>7</sup>
- Off Premise Service is offered on an unbundled basis, as shown in the attached tariffs.<sup>8</sup>
- Pacific Bell's payphone operation will purchase Off Premise Service for use with payphone services at unbundled tariff rates.<sup>9</sup>
- Pacific Bell's Off Premise Service tariffs do not restrict the ability of PSPs to purchase this service.<sup>10</sup>
- Off Premise Service is available to our own payphone service operation and to other PSPs at the same time in any given geographical area.<sup>11</sup>

---

<sup>4</sup> In its initial Report and Order in Computer Inquiry III, the Commission specified the showings that must be made in a CEI plan. Amendment of Section 64.702 of the Commission's Rules and Regulations (Third Computer Inquiry), 104 FCC 2d 958 (1986) ("R&O").

<sup>5</sup> See R&O, para. 160.

<sup>6</sup> See id. at para. 157.

<sup>7</sup> See id. at para. 190, which requires sample tariffs.

<sup>8</sup> See id. at para. 158.

<sup>9</sup> See id. at para. 159.

<sup>10</sup> See id. at para. 165.

<sup>11</sup> See id. at para. 163.

- The procedures that determine the timing and quality of installation, maintenance, and repair are identical both for the Off Premise Service that Pacific Bell's payphone operations uses for payphone service and for the Off Premise Service that Pacific Bell offers to other PSPs.<sup>12</sup> Pacific Bell's procedures ensure that there can be no discrimination in time intervals for these functions.<sup>13</sup>
- Off Premise Service minimizes transmission cost differences between interconnection of Pacific Bell's collocated equipment and interconnection of other PSPs.<sup>14</sup> Pricing is the same for collocated and non-collocated use of Off Premise Service because Pacific Bell applies price parity rules approved by the Commission.<sup>15</sup>
- This filing has no effect on end user access. End user customers will continue to access Pacific Bell's payphone services through payphones connected to Pacific Bell's network via the same services that other PSPs can use to connect their payphones to Pacific Bell's network.<sup>16</sup>
- This filing does not affect Pacific Bell's and Nevada Bell's continued compliance with the existing, and any revised, non-structural safeguards regarding:
  - cost allocation;<sup>17</sup>
  - nondiscrimination reporting;<sup>18</sup>
  - network interface disclosure;<sup>19</sup> and
  - CPNI.<sup>20</sup>

---

<sup>12</sup> See id. at para. 161.

<sup>13</sup> The Commission has approved Pacific Bell's procedures in Filing and Review of Open Network Architecture Plans, 4 FCC Rcd 1, paras. 468-70 (1988) and in Pacific Bell Payphone CEI Plan Order, para. 36.

<sup>14</sup> See R&O, para. 164.

<sup>15</sup> When Pacific Bell's payphone service operation uses distance sensitive CEI services, Pacific Bell meets price parity standards that the Commission approved. See, e.g., Amendment of Section 64.702 of the Commission's Rules and Regulations (Third Computer Inquiry), 3 FCC Rcd 1150, paras. 32-34 (1988).

<sup>16</sup> See R&O, para. 162.

<sup>17</sup> See id. at paras. 234-240.

<sup>18</sup> See id. at para. 192.

<sup>19</sup> See id. at para. 252.

<sup>20</sup> See id. at para. 265.

Therefore, the addition of Pacific Bell's Off Premise Service fully meets the CEI requirements.

For the above reasons, this filing is a minor amendment of the type that the Commission has held are generally deemed approved 14 days after filing.<sup>21</sup>

Respectfully submitted,

PACIFIC BELL AND NEVADA BELL

**EXHIBIT A**

**Pacific Bell's State Tariff For Off Premise Service**

**NETWORK AND EXCHANGE SERVICES**

**A8. CONNECTIONS OF PREMISES EQUIPMENT TO EXCHANGE SERVICES**

**8.1 CONNECTIONS OF TERMINAL EQUIPMENT, MULTILINE TERMINATING SYSTEMS AND COMMUNICATIONS SYSTEMS (Cont'd)**

**8.1.16 CONNECTIONS OF OFF-PREMISES LINES FROM CUSTOMER-PROVIDED MULTILINE TERMINATING SYSTEMS**

1. Station lines from a customer-provided PBX system will be provided by the customer to premises of the customer in the same or different buildings on continuous property.
2. Station lines extended from a customer-provided PBX system to a location in the same or contiguous exchange are provided at rates, charges and regulations applicable to PBX extension lines with stations or extension lines without stations as specified in Schedule Cal.P.U.C. No. A10.2, and A3.1.
3. Station lines extended from a customer-provided PBX system to location in a non-contiguous exchange are provided at rates, charges and regulations applicable to Special Access Voice Grade Service as specified in Schedule Cal.P.U.C. No. 175-T, 7.5.3. (T) (T)
4. Intrasystem wiring associated with customer-provided key equipment will be provided by the customer to premises of the customer in the same or different buildings on continuous property.
5. Intercommunicating lines may be extended from a customer-provided key equipment to a different building on noncontinuous property in the same or different exchange at rates, charges and regulations applicable to Special Access Voice Grade Service as specified in Schedule Cal.P.U.C. No. 175-T, 7.5.3. (T) | (T)
6. Non-key stations or key systems at an off-premises location on lines extended from a customer-provided multiline terminating system will be provided by the customer.
7. Off premises extensions from customer-provided key telephone type systems that terminate on non-key equipment will be provided by the customer in the same or different buildings on continuous property.

(T)

B. REGULATIONS (Cont'd)

2. Off Premise Service - Same Exchange

- a. Mileage rates are applicable in connection with extension services, PBX stations, telephone answering equipment stations, automatic call distributing service lines or key equipment stations, excluding secretarial lines, located off the premises on which the primary service is located and within the same exchange or district area, except as otherwise provided.

Mileage charges are in addition to the other rates applicable to the service involved.

- b. When any line involves more than two terminals, the rate will be computed separately for each leg. The number of legs on which the total charge is based will be one less than the total number of terminals but must include all terminals involved.

The total mileage to which the mileage rates are applicable, is the combination of leg mileages computed in whole quarter miles. This gives the least total.

- c. No mileage charge is applicable to an extension service from an off-premises extension service, PBX station or telephone answering equipment station located on the same premises as that off-premises extension service, PBX station or telephone answering equipment station.
- d. In this schedule "terminal" means a station, PBX switchboard, telephone answering equipment, customer premises automatic call distributing service common equipment or key equipment to which the off-premises line is connected.
- e. The following rates and preceding regulations are equally applicable to Utility-provided or customer-provided equipment and systems, with the following exceptions:
- (1) The customer is responsible for the provision of lines between terminals associated with customer provided terminal equipment or between customer provided multiline terminating systems and customer provided terminal equipment or between terminals associated with customer provided terminal equipment or multiline terminating systems in different buildings on continuous property within or beyond 300 feet. The Utility may provide additional labor at the customer's request and expense.

10.2 MILEAGE AND CHANNEL TERMINATION CHARGES (Cont'd)

(T)

B. REGULATIONS (Cont'd)

3. Off Premise Service - Contiguous Exchange<sup>1</sup>

- a. Mileage rates are applicable in connection with extension service, PBX and telephone answering equipment station lines, excluding secretarial lines, located off the premises on which the primary service is located and in an exchange area contiguous to that in which the primary service is located or where there are district areas in a contiguous or a noncontiguous district area within the same exchange.

Mileage charges are in addition to the rates applicable for such stations on the same premises as the primary service.

The application of these rates is in accordance with the regulations governing foreign exchange service.

- b. The rates shown are applicable in connection with PBX stations, excluding secretarial PBX station lines, located in:

- (1) The San Francisco exchange and connected to a PBX attendant position located in the East Bay exchange.
- (2) The East Bay exchange and connected to a PBX attendant position located in the San Francisco exchange in addition to the rates for PBX stations on the premises on which the PBX attendant position is located.

4. DID/IOD - Noncontiguous Exchange

Mileage rates are applicable in connection with PBX station lines of a Dial PBX service that is arranged for Direct Inward Dialing (DID) and/or Identified Outward Dialing (IOD) where the PBX station lines is located off the premises and in an exchange area that is noncontiguous to that on which the customer's attendant position or dial switching equipment is located.

Mileage charges are in addition to the rates applicable for such stations on the same premises as the primary service.

NOTE 1: See B.2.g. preceding

5. Secretarial Line Service

a. Same Exchange

Mileage rates shown in C.6.a.(1) following, are applicable in connection with secretarial lines terminated on telephone answering equipment located in a different building from that in which the primary service is located and within the exchange area, except as specified in c. following.

Mileage charges measured in airline distance between Rate Centers, are (T)  
in addition to other rates applicable to secretarial lines.

b. Contiguous Exchange

Mileage rates shown in C.6.b. are applicable in connection with secretarial lines terminated on telephone answering equipment located in a different building from that in which the primary service is located and in an exchange area contiguous to that in which the primary service is located, except as specified in c. following.

Mileage charges measured in airline distance between Rate Centers, are (T)  
in addition to the other rates applicable to secretarial lines.

The application of these rates, except the manner in which mileage is (T)  
measured, is in accordance with the regulations governing foreign (T)  
exchange service.

c. Terminating on a Concentrator Unit

The application of mileage rates in connection with a secretarial line, extension of an individual or two-party line or extension of a trunk line from customer's primary service terminating on a concentrator unit is as follows:

- (1) When the primary service is located in a district area or exchange designated by the customer to be served by the concentrator unit, the rate specified in C.6.a.(1) (USOC 1LJBJ) applies.
- (2) When the primary service is located in another district area or exchange, the rates shown in C.6.a.(2) and b. apply. In this case the mileage rate is applicable to the airline distance measured between the rate center of the district area or exchange in which the primary service is located and the rate center of the district area or exchange designated by the customer to be served by the concentrator unit.

5. Secretarial Line Service (Cont'd)

c. Terminating on a Concentrator Unit (Cont'd)

d. Noncontiguous Exchange

The mileage rates shown in C.6.c. following, are applicable in connection with:

- (1) Secretarial line extensions from business individual line primary services and
- (2) Secretarial line extension of trunk lines, served from a dial central office and terminated on telephone answering cord-operated or key equipment located in a different building from that in which the primary service is located and in an exchange area noncontiguous to that in which the primary service is located.

Mileage charges measured in airline distance between Rate Centers, are in addition to the other rates applicable to secretarial lines. The application of these rates, except the manner in which mileage is measured, is in accordance with the regulations governing foreign exchange service.

**6. Signaling Arrangements**

Signaling arrangements<sup>1</sup> are required to allow for direct connection of terminal equipment and systems to off-premises station channels used with private branch exchange, Centrex-CU or similar multiline terminating systems arranged for dial signaling.

This requirement is in accordance with The Federal Communications Commission Order Docket No. 79-143 amending Part 68 of the Commission's Rules and Regulations applicable to certain Category III services.

The following signaling arrangements provided at no charge, are required in addition to C.3.a., b., 4.c., d. and 5. following:

**a. Type A**

Furnished for use with class A station ports capable of operation over channels with resistance in the range of 0-199 ohms. (USOC-SAL)

**NOTE 1: Except for continuous property.**

c. Type C

Furnished for use with class C station ports capable of operation over channels with resistance in the range of 900 ohms or more. (USOC-SAY)

7. Tie Line Service

Applicable to tie line service between private branch exchange systems located within the same exchange.

- a. The following rates apply to the airline distance measured between the terminals of the tie line involved.
- b. The following rates for tie line service between PBX systems provide for the furnishing of two-point connections as follows:

- (1) Connection between any two stations connected to and on the same premises as the attendant position in which the tie line terminates.
- (2) Connection of a single tie line (at either end but not both ends simultaneously) to a PBX trunk line or where facilities and operating conditions permit, to a Special Access Voice Grade Service or another tie line.

(T)

- c. Tie line service between a PBX system and a cord-operated telephone answering equipment system, a dispatching telephone system or automatic call distributing service or between cord-operated telephone answering equipment systems or between dispatching telephone systems is also provided at monthly rates and regulations equivalent to those following.
- d. The rates and regulations for tie line service are equally applicable to tie line service terminated in Utility-provided private branch exchanges or customer-provided multiline terminating systems that are similar to Utility-provided systems offered for use with tie line service.

- e. In accordance with the Federal Communications Commission Order CC Docket No. 79-143 amending Part 68 of the Commission's Rules and Regulations to allow for direct connection of terminal equipment and systems to certain Category III services, the following is required in addition to C.7. following, at no increase in rate:

Signaling Arrangements - except for continuous property. For tie line operation channels used with private branch exchange (PBX) to PBX, PBX to Centrex or similar multiline terminating system arranged with an ESM type signaling interface. (USOC-SLM)

- f. The rates and charges for tie line USOC 1LTBA apply only to those in service as of September 20, 1984, and which continue to be furnished to the same customer at the same location.

**8. Metallic Service**

(N)

As of January 1, 1995, customers of record with Metallic Service may add to existing circuits as long as the circuit design does not require new interoffice facilities. Customers can continue to request moves or disconnection of existing circuits as long as the changes do not require redesigns of the existing circuits. New Metallic Service is not available.
